PARAVAN

PR 25

As flexible as no other powerchair

With our newest member of the PARAVAN power wheelchair series, you can comfortably lower the seat all the way down to the ground. You can easily reach objects on the floor and children can play with others and be at the same height for story or play time. Another unique feature is the ability to move the seat completely forward horizontally, which makes transfers a lot easier. In addition, the PR 25 is equipped as standard with an easy-to-use joystick control and an individually adjustable seat system that grows with the child.

YOUR BENEFITS

Highlight: Seat-to-floor function

Thanks to the electric length and lowering function, the seat can move forward and downward all the way to the floor

Highlight: Getting in and out from the floor

With the PR 25 we offer a unique power chair with a low entry height when the seat is on the floor
